EDUCATION AND ACADEMIC ACHIEVEMENTS

Cornell University- Master in Systems Engineering, Graduating (GPA=4.17, top 10% of the class) **2025-2026**

- Inducted into The Honor Society of Phi Kappa Phi, the nation's oldest and most selective all-discipline honor society.
- Awarded Academic Fellowship for outstanding performance in AI coursework

Buenos Aires Institute of Technology: Data Science **2020-2024**

Relevant courses: *Data Science and AI for Systems Engineering,*Project Management,*Six Sigma for Reliable Systems (Black Belt),Data Structures and Programming

RELEVANT EXPERIENCE

Bobi Inc —CTO Cofounder *Aug 2025 – Present | Remote*

- Built Bobi's iOS app to connect content creators with small businesses, by defining product scope and system architecture and developing the platform in Swift language with Gemini AI and Instagram Graph API integrations
- Validated product-market fit through structured stakeholder interviews and iterative feature releases, translating user feedback into prioritized roadmap decisions
- Delivered a production-ready app after 4 months of development and adopted 20+ early users in early 2026

LoopStudio — Project Manager / Data Scientist *Jun 2024 – Sep 2025 | U.S. Remote*

- Delivered end-to-end client data and software systems by leading cross-regional engineering teams and coordinating technical execution across projects with ~\$10K monthly budgets each, achieving 5 successful production deployments within a year
- Eliminated ~16 weekly manual reporting hours across 4 Project Managers by building an internal automation application integrating the Harvest API and a structured data processing layer mapping time data to staff, projects, and clients.
- Built automated performance dashboards and project analytics views from the processed data, enabling real-time visibility into team utilization and client delivery metrics

Agile Solutions — Project Manager *Apr 2022 – Aug 2023 | U.S. Remote / Argentina / Sweden*

- Built the Argentina technical team from inception by leading recruiting and managing deliverables, establishing a fully operational delivery unit of 12 people with a budget of around \$20k per month
- Engineered a legally compliant cross-border contractor structure that allowed software engineers to avoid punitive currency conversion losses, enabling competitive compensation under a constrained startup budget and improving talent retention
- Developed Python and Power BI analytics tools for staffing and compensation planning, reducing compensation costs by ~50% versus market benchmarks
- Relocated to Sweden to secure AI ecosystem partnerships, defining the company's 2023 AI strategy

Cornell University — Graduate Research and Teaching Assistant (Data Science & AI) *Jan 2026 – Present | Ithaca NY*

- Support graduate AI coursework by mentoring student data and API projects, improving technical project execution quality

SKILLS

Leadership: Lead Project Manager in Systems Engineering project at Cornell, Cornell Meng. Ambassador (2025-2026).

Advanced Tech Skills: Python, R, SQL, Spark | Analytics (Tableau, Power BI, Excel) | Web & Mobile Development.
